

48750 Walker St. N.Y. Feb 12, '79

Prof. Geo. Gray

Dear Sir,

Yours of Feb 7th is at hand.

The "Catalogue of the Species in the Manual", which you propose getting up, we do not suppose would be of any direct profit to the Publisher, as the sale must, necessarily, be quite limited. It might, however, be of some advantage to the Series; and with that view - it might answer to publish it. We do not think, however, it would justify any copy-right - and we think you are proposed to us to publish it without copy-right. If you choose to prepare it as you proposed, we will publish it if you think best.

We enclose herewith, receipts for the Copper-plates of the Mosses in Manual.

Yours truly

Wilson & Hinney
